Medium to large Instal- lations, multi - office configure- tions, multi – tenant and multi-unit dwellings, home office setup, family home asterisk setups. Database- driven applications, web-based configuration tools, low cost unlimited long distance.

SMATV System

SMATV System (Satellite Master Antenna Television) or IF Distribution System as it is commonly known is a Network capable of delivering multiple satellite services in a MDU (Multi Dwelling Unit). Our SMATV System also known as Integrated Reception System (IRS) is capable of delivering digital Satellite TV services. The system distributes digital signals from the communal antenna of each home in the MDU. This green concept helps to end disputes with your tenants about putting dishes all over your property as you are already providing them with a solution. The residents won't have to install individual dishes on their balconies or on the roof top. This helps in maintaining the appearance of the area and preserving the aesthetic look of the property. Our solu- tions are cost effective, expandable and transparent to all value added satellite services.

SMATV Systems are useful in and needed in

☑ **Residential Building Blocks**

☑ **Dormitories & CampsSS**

☑ **Home Distribution in Villa**

☑ **Health Clubs**

☑ **Hotels**

SMATV System enhance building services, Protect buildings from damage and unsightly installation of Satellite antennas and provide building owners and land- lords with a solution that meets both their needs and the needs of their residents.
